EXPERIENCE

- Kynhood

Product Designer

Jun 2024 – Jun 2026

Chennai

- Owned the Events feature from zero to one. Designed the full product across three platforms, web, mobile, and operator portals, from the first wireframe to a shipped, accessible experience. The feature crossed **Rs. 3 Cr GMV** in eight months.
 - Used Mixpanel, Clarity, and Google Analytics to find where users were dropping off, then built prototypes, ran usability tests, and iterated until it held. Organic retention went from **10 per cent to 31 per cent**, a **3x improvement**, with no paid push.
 - Built and maintained the design system, component libraries, and style guides across all platforms. Worked directly with engineering and product to keep handoffs clean and reduce implementation back and forth.
 - Used AI tools including Cursor, Claude, and Lovable as part of the daily workflow to move from idea to interactive prototype before any production code was written. Automated OPS and Legal workflows through design, removing manual steps the team had been living with.
- Spaarks

UX Design Intern

Feb 2024 – Jun 2024

Remote

- Built a computational design system from scratch. Defined the component structure, visual language, and style guide so the team had one reliable source of truth to build from.
 - Contributed to PRDs and worked across the full product cycle, user research, usability testing, competitor analysis, and design validation, making sure each feature shipped with the right problem solved.
- Cloud Counselage

UX Design Intern

Feb 2022 – Aug 2023

Remote

- Owned the design end to end on an early-stage product. Built and shipped an MVP independently using Framer and Wix, going from wireframes and clickable prototypes to a live product.
 - Developed the fundamentals that shape everything I do now: information architecture, interaction design, typography, colour theory, grid systems, spacing, and visual hierarchy.

SKILLS

Design Tools Figma, Sketch, Adobe XD, FigJam, Illustrator, Photoshop, Canva

AI and Build Cursor, Claude, Lovable, Bolt, Windsurf, Framer, Wix

Analytics Mixpanel, Clarity, Google Analytics

UX and Design User research, Usability testing, User personas, Journey mapping, Wireframing, High-fidelity UI, Interactive prototyping, Information architecture, Interaction design, Design systems, Component libraries, Token-based design, Style guides, Responsive design, Accessibility (WCAG), Typography, Colour theory, Grid systems, Competitor analysis, Data-driven design, SaaS product design

Interests MCP-Figma integration, Agentic AI workflows, AI-native product design, Design systems at scale, IoT product UX

Certifications UX – Accenture, GUVI, Meta Microsoft – AZ900, PL900

EDUCATION

- B.Tech – Artificial Intelligence and Data Science

Sri Manakula Vinayagar Engineering College

2020 – 2024

87%

CASE STUDIES

- Kynhood – Design System

Tokens, components, and theming built from first principles. Covers web, mobile, and operator surfaces with full documentation.

View
- Spaarks – Design System

End-to-end design system built during the internship. Component architecture, style guide, and shared design language for the product team.

View

- Stimuler – UX Enhancement** View
Ran user research, identified where learners were losing interest, and redesigned the key flows. Retention and engagement improved measurably.
- Coinpedia – Redesign** View
Simplified a cluttered fintech interface. Refined the information architecture and visual hierarchy to make the core flows feel effortless.
- Recruit CRM – Usability Enhancement** View
Audited a B2B SaaS recruitment tool, identified usability gaps, and redesigned the high-friction areas with better interaction patterns.
- 99acres vs MagicBricks vs Housing – Competitive Audit** View
Full competitive analysis of three major real estate platforms covering UX, information architecture, and visual design decisions.

ACHIEVEMENTS

- Designathon 2025 – Lollypop Design Studio** Selected in Top 6 of 15 Teams *Aug 2025*
- Hackfest 2022 – PSG iTech** Selected in Top 25 of 600 Teams *Sep 2022*
- Hackathon 2022 – Cloud Counselage** First prize at National level *Apr 2022*
