EXPERIENCE

- Kynhood

Product Designer

Jun 2024 – July 2026

Chennai

 - Designed and shipped the cross-platform **Events (0 to 1)** product from initial wireframe to launch across 3 web/-mobile applications and operator portals, scaling it to **Rs. 3 Cr GMV** in 8 months.
 - Tripled product user retention from **10% to 31%** organically by identifying drop-off friction points via Mixpanel and Clarity, subsequently designing targeted high-fidelity UI/UX interventions.
 - Owned the unified design system lifecycle; scaled reusable component libraries, minimized engineering handoff friction with pixel-perfect specifications, and leveraged AI tools (Cursor, Claude, Lovable) to build rapid interactive prototypes.
- Spaarks

UX Design Intern

Feb 2024 – Jun 2024

Remote

 - Built a computational design system from the ground up – consistent UI components, a cleaner style guide, and a shared visual language for the product team.
 - Contributed to PRDs and sat across the full product cycle: user research, usability testing, competitor analysis, and design validation.
- Cloud Counselage

UX Design Intern

Feb 2022 – Aug 2023

Remote

 - Took early ownership – designed and shipped an MVP independently using Framer and Wix, from wireframes and clickable prototypes all the way to launch.
 - Built my foundation here: information architecture, grid systems, interaction design, typography, color theory, spacing, and visual hierarchy.

CASE STUDIES & WORKS

- Coinpedia – Redesign

Untangled a cluttered interface – refined the IA, tightened visual hierarchy, and made core flows effortless without breaking what worked.

Read Now
- Stimular – UX Enhancement

Talked to users, found where they were getting lost, and redesigned key flows with empathy – measurably improved retention and engagement.

EDUCATION

- B.Tech – Artificial Intelligence and Data Science

Sri Manakula Vinayagar Engineering College

2020 – 2024

87%

TECHNICAL SKILLS AND INTERESTS

Design Tools: Figma, FigJam, Sketch, Adobe XD, Illustrator, Canva

AI-driven Prototyping: Cursor, Claude, Lovable, Bolt, Windsurf

Low Code: Framer, Wix

Analytics: Mixpanel, Clarity

Practices: Responsive design, Accessibility (WCAG), Typography, Color theory, Visual hierarchy, Grid systems, Information architecture, Interaction design, Usability testing, High-fidelity prototyping, User personas, Journey mapping, Wireframing, Mockups, Component libraries, Design systems, Brand identity, Design thinking

Interests: Design Systems, MCP-Figma, IoT & Connected Product UX, Competitor Research

Certifications: UX – Accenture, GUVI, Meta; Microsoft – AZ900, PL900
